## XMP-150G Gas Floor Finishing Vacuums

Get even the biggest floor finishing jobs done in no time — dust free! This heavy-duty, 15-HP Kohler engine gas-powered floor finishing vacuum is for the serious contractor who needs a *positive displacement* vacuum system that performs job after job, flawlessly, even in the toughest conditions.

Boasting a super-charged 400 CFM vacuum airflow and 18-gallon storage capacity, the XMP-150G can easily handle simultaneous operators, each with up to 200 feet of vacuum hose — *all day long*.

This revolutionary gas-powered floor finishing vacuum is like nothing else on the market today. Incredibly powerful suction, super-effective fine-dust capture, reliability, low maintenance and rugged construction — the XtractMAX<sup>®</sup> XMP-150G has no equal!

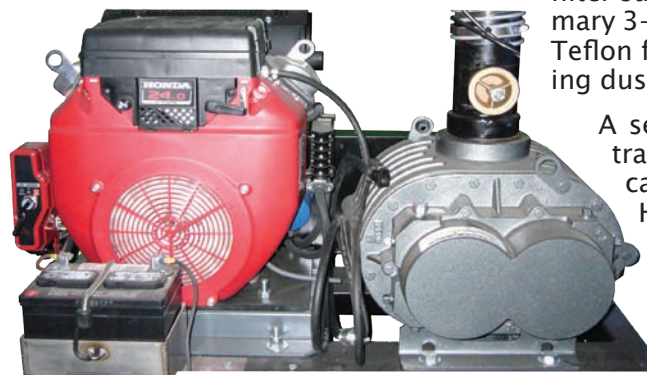

***Greater suction power,  
longer continuous operation  
and more effective filtration  
than any other floor finishing  
vacuum on the market***

### Exclusive 2-Stage Filter

Our revolutionary two-stage filter system ensures dust-free hardwood floor sanding, concrete polishing and grinding with 22.8 square feet of inline filter surface. 30.8 square feet of primary 3-Year high-efficiency bag-style Teflon filter is 99% efficient at capturing dusts as small as .5 microns.

A secondary inline cartridge filter traps particulate to 1 micron and can be easily upgraded to a true HEPA filter.
