XMP-240G Gas Floor Finishing Vacuums

Get even the biggest floor finishing jobs done in no time — dust free! This heavy-duty, 24-HP Honda twin-engine gas-powered floor finishing vacuum is for the serious contractor who needs a *positive displacement* vacuum system that performs job after job, flawlessly, even in the toughest conditions.

Boasting a super-charged 650 CFM vacuum airflow and 41.1-gallon storage capacity, the XMP-240G can easily handle simultaneous operators, each with up to 200 feet of 3" vacuum hose — *all day long*.

This revolutionary gas-powered floor finishing vacuum is like nothing else on the market today. Incredibly powerful suction, super-effective fine-dust capture, reliability, low maintenance and rugged construction — the XtractMAX[®] XMP-240G has no equal!

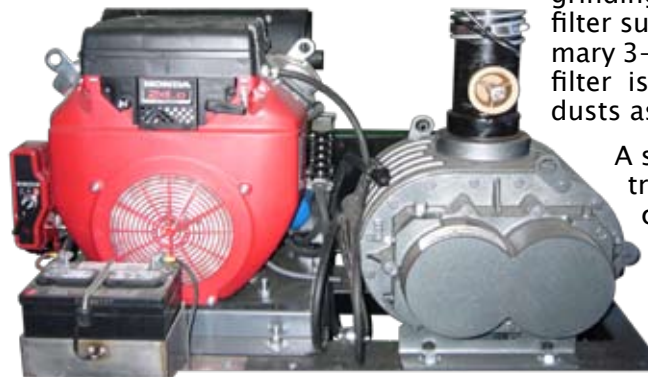

***Greater suction power,
longer continuous operation
and more effective filtration
than any other floor finishing
vacuum on the market***

Exclusive 2-Stage Filter

Our revolutionary two-stage filter system ensures dust-free hardwood floor sanding, concrete polishing and grinding with 57 square feet of inline filter surface. 61.4 square feet of primary 3-Year high-efficiency bag-style filter is 99.9% efficient at capturing dusts as small as .5 microns.

A secondary inline cartridge filter traps particulate to 1 micron and can be easily upgraded to a true HEPA filter. This vacuum offers *3 times the filter surface area of any other hardwood floor sanding vacuum on the market today!*
