Xtract[®] MAX

CERTIFIED DUSTLESS

Compact - Portable Electric

The NEW XtractMAX[®] electric series of portable intermittent duty vacuums are small in size but huge in performance! The oversized, high-efficiency filters and lightweight easy maneuverability make XtractMAX[®] the ideal solution for even the finest dry material cleanup — powder coating, carbon black, talc, concrete dust, lead and asbestos.

Up to 28 sq ft Filter Media

For added storage capacity or liquid cleanup, simply connect the optional Pre-Separator System.

The massive low-loading filter allows large quantities of materials to be picked up *without* loss of suction — with an incredible **3 to 5 year average filter life**.

The convenient foot-lever access makes for hassle-free emptying of the huge 9-gallon dustpan.

The compression cast composite construction of XtractMAX[®] is incredibly rugged. It will not dent or rust, is abrasion resistant and chemically neutral.

Optional HEPA Final Filter available
99.97% Efficient to .3 microns

Powerful, rugged, portable, efficient and low-maintenance, XtractMAX[®] will handle your toughest vacuum and dust collection needs.

Pre-Separator

Optional Pre-Separator System attaches directly to XtractMAX[®] for additional material storage and liquid cleanup.

More storage means less down time and longer filter life.

Vacuum Equalizer Kit allows poly drum liner for easy debris removal.

- 20/30/55 Gallon Options
- No Filters Required
- Removes 90% of dry dust
- Removes 100% of liquids

Vacuum Hose and Tools For Every Application

Model	CFM	Vacuum (Hg")/(H ₂ O")	Voltage	Weight	L x W x H "	Filter Area	Noise
